

BSc (Hons) Biotechnology
SC1153: Introduction to Biotechnology
Batch 13

Assignment 2: Introduce an exciting new product developed using Biotechnology

Find information about **a new product in any area of Biotechnology** which has been developed using biotechnology related approach. Create a **10-minute video**. This is again a group assignment. You have to give a message to the general public through this video.

Everyone will be divided into 9 groups and you can find it in the attachment titled “Assignment 2 – Groups” on CourseWeb. Once you choose a product to present, enter the product name next to your group number so no two groups will focus on the same product.

Use the following to develop your video

Introduction

Content

Conclusion

The date for the video presentation is 24th July 2026 (Friday)

Do not copy from the videos available on the internet.

Find as much relevant information and create the video in your own style.

Each member should present individually then put all together in one video. The image of the presenter should be visible with his/her name and the registration number.

You will present your video in the presence of evaluators.

Evaluators and audience will ask questions from any member of the group.

You will add your evaluation to the portfolio.

Upload the video to the cloud on or before **24th July 2026**

The first slide should contain the presenting order.
